

WHEAT FARMERS FOR MARKETING QUOTAS

Husband Grilled about Murder

UNDER cross-examination at an inquest in Bay Village, O., Dr. Samuel Sheppard (right) denies participating in trysts with a nurse whom he gave a \$50 gift watch. Sheppard denied amorous escapades amid insinuations that quarrels over "other women" may figure in the mystery slaying of his attractive wife, Marilyn. She was bludgeoned to death in her bed at their home in the Cleveland suburb. Cuyahoga County Coroner Samuel R. Gerber is questioning him.

(International Soundphoto by Chet Wozney)

CLEVELAND (AP)—Here and in California, detectives worked today in a stepped-up effort to solve the Marilyn Sheppard murder, a crime for which no motive and no weapon have been found, although it is three weeks old.

Two days of inquest, with hours

of questioning directed at seven witnesses, added little to what already had been known. The major part of the answers came from the slain woman's husband, Dr. Samuel H. Sheppard, 30.

From San Francisco, Thomas J. Parrino, assistant Cuyahoga Coun-

ty prosecutor, and Robert Schottke, Cleveland detective, set out today to check up on a visit Sheppard and his wife made to California in early March.

Their first stop will be Monterey, where the murder victim stayed from March 3-15 at the ranch home of Dr. Randall J. Chapman, a Burbank osteopath. Dr. Sheppard joined her there March 12, after spending two weeks in Los Angeles.

At the inquest yesterday, Dr. Sheppard said he spent several days of that time in Los Angeles as a house guest of a Dr. and Mrs. Arthur Miller and that Miss Susan Hayes, a pretty 23-year-old hospital technician he had known in Cleveland, came there also as a guest of the Millers.

Coroner Samuel R. Gerber asked Sheppard if he and Miss Hayes had any sexual relations during that time, and the osteopath said he had not then nor "at any time."

Only eight of the 18 persons aboard the airliner were rescued.

In London, the Foreign Office spokesman said the British government acted on the basis of statements from the pilot and co-pilot of the Skymaster.

He said Charge d'Affaires Humphrey Trevelyan has been instructed to draft a formal protest and it presumably would be delivered to Red China later today.

HAINAN, WHICH lies about 200 miles southwest of here, is the site of several large Communist military air bases.

Chief Stewardess Iris E. Stobart, of Cathay Pacific Airlines said bullet holes removed today from two of the eight survivors picked up by U. S. Air Force Albatross rescue plane. Two doctors said one man suffered what might have been a bullet wound, but that no bullets were recovered.

J. Thorburn, Hong Kong Bank official whose wife was rescued, said a bullet struck her a glancing blow above the ear.

He quoted her as saying bullets

spattered among the passengers and unquestionably a number were hit. He said his wife doubted that others were able to escape before the four-engine airliner went to the bottom of the South China Sea.

An official Hong Kong government announcement said "there is now substantial evidence that the Cathay Pacific Airways plane which ditched in the sea off Hainan Islands yesterday morning was shot down by two unidentified fighter planes while on its normal route from Singapore to Hong Kong. Enquiries are continuing."

The announcement was broadcast by Hong Kong Radio. It gave no source for the report, but presumably the information was supplied by three members of the crew who survived.

"The important thing from now on," he said, "is not to mourn the past but to seize the future opportunity to prevent the loss in Northern Viet Nam from leading to the extension of communism throughout Southeast Asia and the Southwest Pacific."

SEN. MORSE (Ind-Ore), took

the floor at 2:18 a. m. for more hours of speechmaking to criticize what he says would be the bill's "give-away" of a basic national resource to the "private power monopoly."

In the wake of this opening statement, Dulles was asked what he thought about a Russian declaration of Thursday that more international conferences should now

be held to settle such cold war issues as the future of Germany, Korea and Australia and disarmament and H-Bomb control.

Dulles said that the American government was always hopeful of Soviet cooperation. But, he declared, this country has gone a long way in recent meetings to test out the good faith of the Soviet Union and so far the results have been entirely negative.

1. If the United States and its Allies act quickly and decisively they can take military, political and economic measures which should save the rest of Indochina from Communist conquest either by a new open aggression or by subversion,

2. Just because Russia and Red China agreed to an Indochina settlement, this does not provide any basis for believing the Communists will now agree to desirable Korean, German and Austrian settlements or to disarmament and atomic bomb control systems.

These points stood out in a news conference held by Secretary of State Dulles late yesterday near the end of a hectic week in international affairs. They demonstrated that the American government assumes the cold war is still a very active combat and that Russian talk of sweeping world settlements is simply propaganda designed to muddle the West.

DULLES SAID again that the Indochina settlement was one which the United States did not like, but that in effect it simply reflected the military reality of a situation in which French-led forces were losing and Communist troops were winning the Indochina war.

Then it adjourned till Monday after a parliamentary maneuver by Rep. Murray (D-Tenn) forced delay of the final, formal rollcall vote on the bill.

In the Senate, where there has been plenty of oratory but few votes in a round-the-clock meeting that started Wednesday morning, weary administration supporters were still seeking in vain for an agreement which would move the disputed measure forward along the lines they want.

SEN. MORSE (Ind-Ore), took

the floor at 2:18 a. m. for more

hours of speechmaking to criticize what he says would be the bill's "give-away" of a basic national resource to the "private power monopoly."

Morse opened up after Sen. Sparkman (D-Ala) had held the floor 5 hours, 12 minutes. Sparkman, another member of a determined band of opponents composed mostly of Democrats, asked a

stalemate in the bill to allow a longer government holding period on atomic patents.

Sen. Knowland of California, the

Republican leader, said he plans to press Monday his cloture petition to limit debate, unless he gets an earlier agreement to shorten the talkfest—an accord he has been unsuccessful in gaining in repeat attempts so far.

But there are no indications his

cloture move, already introduced

with the signatures of 38 GOP

senators, is likely to gain the 64-member approval needed to take effect if he presses it to a vote.

Most of the 47 Democrats and

several Republicans were reported

opposed to the cloture attempt.

In the House, where strict debate-limiting rules are the normal course, administration forces held solid sway yesterday and into the wee hours of the morning as they went through the complicated bill.

The measure in general would

revise the original 1946 atomic energy law to allow a limited sharing of atomic information with U. S. Allies and to let private industry enter the field of peacetime atomic power development.

Down on the Farm

2 The Record-Herald Sat., July 24, 1954

Washington C. H., Ohio

Spotlight Put On Livestock

Farm Economists Give Opinions

Livestock prospects commanded the spotlight among questions put to seven leading farm economists who voiced their predictions in a current national farm magazine interview.

Capper's Farmer field editors asked the farm management experts whether hog raisers should sell sows due to farrow in September or keep them and raise the pigs.

Let the sows farrow and raise the pigs if the hog project is a regular part of your farm business, suggested Ernest T. Baughman, Federal Reserve Bank of

Official.

"Self-feed a good ration and market at about 220 pounds," he said. "Profit margins will be narrow, but efficient raisers will be in the black on early fall pigs."

J. Carroll Bottum, Purdue farm economist, said prospective hog and feed prices "should bring normal returns" for pigs fed to finished weights and marketed in late winter and early spring of 1955.

THE ECONOMISTS were then asked if it will pay to feed cattle now in the feed lot to prime grade.

Bottum speculated that the practice "might pay in a few cases" where feeding to prime would help you hit a better market. "It will pay if you can market them by mid-August," said Leonard Schruben, Kansas State College farm specialist.

Early sale of feeder cattle looks like the best bet, according to the group of economists.

"Many feeders who waited too long last year are planning to buy early," pointed out Francis Kutsch, Iowa State College.

Schruben said: "I suspect the high price will come about the first week in August, however, much depends on the weather and feed situation."

The farm experts concluded that beef and sheep, in general, offer the best chance for profit from diverted acres.

"Try to use more pasture and legume hay as a substitute for concentrates in your present operation," said Gene Hamilton, director of research, American Farm Bureau Federation. "Increase sheep production if you know the business. Increasing beef cattle numbers looks better than increasing dairy production."

Push Button Fly Control Is Now Here

Now you can have push-button fly control for dairy cattle with an automatic barn fogger.

All you need for the system, says E. H. Fisher, University of Wisconsin, is a half-gallon jar fitted with a special 4-direction nozzle attached to an air compressor, a one-third h.p. electric motor and an air compressor that builds 20 pounds pressure at the nozzle.

Just drive the cows in the barn, close the doors and windows, flip a switch as you leave, and come back in 3 to 5 minutes to shut the outfit off.

One sprayer hanging in the middle of a 60-foot barn gives a good fog treatment in 3 minutes, according to Capper's Farmer. For a 100-foot barn, it may take 5 minutes.

Larger barns may need two sprayers. Fisher estimates a complete outfit for a 60- to 75-foot barn costs about \$60.

For a quick knock-down spray, Fisher recommends 15 percent pyrethrins and 1.5 percent piperonyl-butoxide in an oil-base spray.

New Methods For Testing Moisture

Two new methods for determining soil moisture for irrigation are out of the testing stage. One is a fully automatic electric system in use at Michigan State College, and the other is a manually read indicator being produced in California.

The Michigan device not only detects when moisture is needed but burns water on. It has three parts: a nylon soil "moisture-sensing" unit, a solenoid valve and an electric controller. It is used mainly in greenhouses now, but with further development it may find farm application.

The California indicator is a plastic tube that is driven into the ground. The tube is filled with water and driven down to root zone depth.

In dry soil, water is drawn out through a porous ceramic tip on the tube. A vacuum is created and registered on a gauge. The drier the soil, the higher the reading.

Alfalfa Fields May Get Hungry

Symptoms Described For Fertilizer

Watch your alfalfa fields for hunger signs in the weeks ahead, advises the Middle West Soil Improvement Committee.

"By checking up on plant food starvation symptoms now," says a statement issued by the committee, "you can top dress fertilizer to protect stands and revive growth."

Potash hunger on alfalfa shows up first in a row of yellow dots around the edges of the leaf, says the committee. These dots get bigger until the entire leaf turns yellow. The first yellow spots eventually become brown and then the leaf dies, potash starved alfalfa winter-kills easily.

Established alfalfa stands that are badly starved for potash, can often be brought back to profitable high yielding production by top-dressing with fertilizer such as 20-20, 10-10-30 or 0-0-60.

SHORT, stunted alfalfa plants are frequently a sign of phosphate hunger, says the committee. Where there is a good stand, it sometimes pays to top-dress with a phosphate fertilizer. But if stands are thin, they cannot be thickened by top dressing. In such cases the best thing is to test the soil to see how much phosphate is required, plow up the stand and reseed.

Boron starvation is indicated by a slowing of the growth at the tip. Or such growth may stop altogether. The tips of the leaves have a yellowish appearance. Evidences of boron hunger are found most frequently on the second crop of alfalfa, in dry years. Then it is profitable to top-dress with 15 to 30 pounds of fertilizer borate per acre, either alone or mixed with phosphate-potash fertilizer.

"While hunger signs are important in showing the need of alfalfa for plant nutrients, they are not the only guide," says the committee. "Soil and tissue tests are effective, too."

Best Plan Possible

WASHINGTON (B) — Undersecretary of State Walter Bedell Smith, who represented the United States at the Geneva Conference, said today the Indo-China peace settlement was "the best which we could have possibly obtained under the circumstances."

GOOD HAY RECORD

Here is a very good hay record that was recently given on a WLW radio farm program—almost one (Please turn to Page Nine)

HOG MEN...

Make every minute count!

Just how long the good hog prices will last is anybody's guess. But they are very attractive at present, so hog men who hurry their hogs to market are sure to cash in on the high prices.

Every minute counts! For the last 10 years the high hog price month has been August. Last year's high came in July. There's not much time...get your hogs on an early-to-market program.

Next time you're in town come by our store. We have a program that will help you get your hogs to market in time...help you take advantage of these good prices.

Where Your Food Dollar Goes

THIS PICTURE CHART made from government data collected by the National Industrial Conference board, New York, shows who gets your grocery money. The figures do not carry past 1950.

Corn Crop Will Regulate Price

Hog Production To Be Affected

The 1954 corn crop will give the best cue to hog numbers and prices in 1955, says Guy Miller, Ohio State University extension economist.

If the corn crop is small, farmers won't raise as many hogs.

A large '54 corn crop and lower new corn prices will undoubtedly influence many farmers to market their corn through hogs. That will put more pork in stores next year.

There is only 59 to 60 pounds of pork per person this year. That's the lowest since 1938. In 1952 the supply was 72 pounds per person.

Miller says Ohio hogs are going to market earlier this year. Earlier farrowing and faster gains last spring help make this possible.

It is feared that some corn and

Corn and Soybeans Here Saved by Week's Rains

Farmers generally agree that the heavy rains earlier this week saved the corn and soybeans crop from serious damage by drought.

Much of the corn was tasseling and ears were appearing, and soybeans were in bloom, but both crops were almost at a standstill for want of moisture. Pasture lands also were in dire need of rain.

Reports indicate that every foot of Fayette County shared the heavy rains during the past few days.

It was more than a million dollar rainfall in this county alone and the corn, soybeans, pastures and other crops have responded quickly to the new life-giving moisture applied in abundance.

Present indications are, with anything like normal rainfall, the corn and soybean crops are virtually assured, since the recent rains came at a most vital time.

It is feared that some corn and

ember. The "big run" comes during that period most years.

Most farmers plan to "top out" hogs as soon as they reach handy market weights. These 190 to 225 pound hogs usually bring higher prices and make cheaper gains than heavier hogs.

Grasshoppers Begin to Hatch

Spraying Now Will Abolish Pests

Grasshoppers are hatching in large numbers in bluegrass areas in orchards, pastures, roadsides and fencerows. Farmers will need to figure how much of their material it takes to get that amount of the killing ingredient. As an example, it takes 2 pounds of 50 percent wettable chlordane powder to provide 1 pound of actual chlordane.

By spraying these hatching areas now, farmers can greatly reduce later damage to crops, he said. It also will take less spray now than for current grasshoppers have spread out over crop fields.

Parks advised farmers to use chlordane, dieldrin or toxaphene spray on roadsides and fencerows that are alongside tomatoes, soybeans, tobacco and gardens. Young fruit orchards also need spraying to protect the trees from the hoppers, he added.

He recommends 1 pound of actual chlordane, 1 ounce of dieldrin or 2 pounds of toxaphene per acre. Farmers will need to figure how much of their material it takes to get that amount of the killing ingredient. As an example, it takes 2 pounds of 50 percent wettable chlordane powder to provide 1 pound of actual chlordane.

Parks said treatment of pastures and meadows is not recommended, due to possible residual effects of the insecticide on the feed. Forage crops for seed may be treated.

MoorMan's helps me

make more milk

Thousands of DHIA Records prove that you get more milk when you balance your own grain and forage with MoorMan's Mintrate.

Because MoorMan's Mintrate for cows supplies the balanced vitamins, proteins and minerals necessary for better utilization of the feed value in your home-grown feeds.

MoorMan's Cow Mintrate not only helps maintain a heavy milk flow—but it also helps keep your cows in top physical condition and corrects many difficulties caused by nutritional deficiencies. And the cost is only a few cents a day.

MoorMan's Cow Mintrate fits into any feeding program—comes in powdered form that makes it easy to pour over or combine with other feeds.

Let me show you examples of how Cow Mintrate is helping many dairymen to greater profits—and how it can help you, too.

Every Wednesday Is . . .

Says Surpluses Are a Blessing

Secretary Davis Is Very Optimistic

John H. Davis, assistant secretary of agriculture, has declared "we should feel blessed, not cursed, by surpluses."

Davis's observations were voiced in an interview with field editors of Capper's Farmer.

"In my opinion, we should feel blessed and not cursed by the existence of excess stocks," he said. "The ability of farmers to produce is assurance that we will not go hungry. It is our potential for a still higher standard of living. And it is a valuable tool for the development of better international understanding."

Speaking from a background of experience with the practical and political aspects of farm programs, Davis said, "We need support prices, and probably some production controls, from time to time to get through a situation that sort of builds up on us. I think there is a way to get through this surplus."

"I feel that it's pretty important that we maintain basic economic stability in agriculture, not only for the welfare of the farmer, but for everybody else in this country and the free world," he said.

DAVIS WAS asked to explain this "basic economic stability for the farmer."

"Well, I don't think we ought to let prices go down, generally speaking, any lower than they are now," he answered. "I think we're ought to stabilize them about where they are."

"Having done that, I think there are four things we can do to manage the surplus. One, we can increase the consumption at home. Two, we can increase the movement of our farm products abroad."

"Then it may be that for a while we'll have to hold greater stocks than we want to; the President suggested the freezing of up to \$2½ billion worth of some stocks if necessary."

"After having done all that, we could have another series of good years, and there would still be greater stocks than we would know what to do with. We may need to make incentive payments to farmers to use diverted acres for soil-building practices."

Choice Beef Is Aim Of Cattle Feeders

Choice beef for Ohio customers is the aim of Ohio cattle feeders meeting at the Harding County Fairground, July 29. It's the feeders' annual summer roundup and barbecue starting at 10:15 A.M.

They will hear 7 Ohio cattlemen tell how to raise and sell choice beef at a profit. They'll also hear Jud Cash, Swift and Henry Order Buying Company, discuss feeder cattle prices.

Other speakers are: Earl Lowe, Hardin County feeder; William W. Prince, president of Chicago Union Stockyards; and J. C. Holbert, president of the Iowa Cattle Feeders' Association.

Not Much Old Corn Will Be Marketed

Reports indicate that the old corn carry-over on the farm in Fayette County will not be great. These reports indicate that by the time the new corn crop is ready for feeding, many farmers will be out of old corn, and those who have more than they desire probably will find a market for it among their neighbors.

The price of hogs also will largely regulate the old corn carry-over this fall.

Production Potential of America

No other country has the productive capacity of the United States. Our production potential is this capacity plus the years that it can continue. Whether it is in manufactured goods, farm products or military supplies, the extent of our potential seems unlimited. The word "seems," however, is an important addition because all items of production are limited by the availability of raw materials.

Our most basic raw materials are soil and water. Some readers may quibble about whether these are actually raw materials, but the farmers of America know what soil and water are regardless of what we call them.

Although the city dweller may not realize it, he also must play his part. Many of these farm practices are impossible without extra financing. The bulk of the farmers cannot afford the measures that are needed. Through well regulated farm programs which are adequately supported by public and private capital, the urban population can help rebuild the basic raw material that will keep them comfortable and restore the production potential of our soils to a high level.

Heat Sickness May Be Serious

Safe Guard Against Heat Exhaustion

During hot weather and the busy season on farms, heat illness can be serious and sometimes fatal. O. C. Croy, assistant director of the Ohio Agricultural Extension Service and vice-president of the Ohio Farm and Home Safety Committee reminded farmers today.

Heat exhaustion and sunstroke are entirely different, although both result from exposure to high external heat. With heat exhaustion, a patient's skin is cold, while with sunstroke the skin is hot and dry.

When treating patients suffering from heat illness, you can avoid confusion by remembering to make hot patients cool and cold patients warm.

The National Safety Council recommends the following precautions to prevent heat illness:

1. Avoid over-exertion particularly in the early part of the heat wave.

2. Avoid too much exposure to direct sun rays or extreme indoor temperatures and high humidity. Wear a hat while out of doors.

3. Wear light porous clothing.

4. Increase the use of salt to offset the excessive loss of salt in perspiration through perspiration.

5. Drink water often throughout the day, one glass at a time.

6. Eat nutritious food but avoid over-eating. Vitamin C lost through perspiration should be replaced with fruit juices.

7. Avoid ice water and alcohol.

More samples are coming to the laboratory after the usual summer slack, Jack D. DeMent, director of the Ohio State University soils inventory laboratory, said today.

He urged farmers to take soil samples carefully. "A soil test can be only as accurate as the sample," he said. County extension agents can show farmers how to take samples correctly.

How Legumes Beat the Weeds

Proper Fertilizing Turns The Trick

Summer seeded legumes or legume-grass mixtures will get the jump on weeds and establish thick growth quickly, if the crop is well fed with plenty of fertilizer, according to the Middle West Soil Improvement Committee.

The committee reports that alfalfa, clovers and all types of legume-grass mixtures are well suited to summer seeding.

A good method to promote well established, high yielding stands is to combine band seeding with the addition of ample amounts of fertilizer to build the soil's overall fertility reserves.

In band seeding, the legume and grass seed is dropped behind the drill so that practically all the seed is about an inch above a band of fertilizer placed about 1½ inches in the ground. By this method the small plants get off to a quick start and have the benefit of a full feed of nutrients while their roots are still tiny—the critical time in the life of the seedling.

Reinforcing band seeding with heavy applications of phosphate-potash fertilizer will insure a season-long supply of nutrients when the rapidly growing roots push down deeper into the soil.

Agronomists report that seedings can be made up to early August.

Summer seedings are recommended where the growing season is sufficiently long to permit the plants to become established after the "usual" summer drought time, the committee says. Northern Corn Belt areas usually get better returns from spring seeding of legumes and legume-grasses.

New Contest Ready For Junior Growers

Junior vegetable growers may take part in a new soil fertility essay contest. It's an addition to this year's National Junior Vegetable Growers' Association meeting to be held at Cincinnati, December 5-9.

Eugene Wittmeyer, Ohio State University extension horticulturist, says the contest is open to any boy or girl 14 to 22 years old. It's a report of the methods and materials a junior vegetable grower used to improve soil fertility in his garden.

Other contests include production and marketing; judging, grading and identification; and demonstration of recommended garden practices.

Boys and girls interested in these contests should contact their county agent or write to Eugene Wittmeyer, Horticulture Department, Ohio State University, Columbus 10, Ohio.

Point Barrow, Alaska is 300 miles north of the Arctic Circle.

FANNIN & COOK

most entirely by their own efforts and with their own labor.

We enjoyed being shown around by one of the good brothers who happened to be a former county deputy master of the Ohio State Grange. The whole trip was, indeed, pleasant as well as inspiring and we all felt amply repaid for our efforts.

We are only hoping that a great many of the folks of Fayette County (Grangers and non-Grangers alike) will want to hear Rev. Hoy speak on the evening of Sept. 13, which is the occasion of our county-wide boosters' night.

Many efforts have been made in the past to get Rev. Hoy as a speaker in our county, but failed. You will be guests of the Granges of Fayette County and we cordially invite you to attend.

'Dust Bowl' Confab Proves Successful

Good rains and the optimistic outlook of High Plains farmers combined to make the recent "dust bowl" conference in Amarillo, Tex. as, one of the best ever held on the problems of dry-land farming.

Although some farmers, especially those from New Mexico and Colorado, reported continued drought, good rains over much of the plains had farmers itching to get home to put abandoned wheat acres into rotation.

In addition to ministering to the spiritual needs of his congregation Rev. Hoy is chaplain of the Ohio State Grange and has been for many years. I say "in addition to" because no matter how many other events or situations present themselves, Rev. Hoy is absolutely loyal to his own little church and allows nothing to come ahead of it.

The subject of his sermon was "How Prayer Can be More Effective" and an inspiring sermon it was.

I had heard Rev. Hoy talk at Grange meetings and to me his words and even his presence is always inspiring. My respect and regard for Rev. Hoy was deepened when I realized how loyal and devoted he was to his little country church even though word of his good works had travelled well beyond the borders of our state.

Those who are not associated with the Grange would probably know him best through his column in The Ohio Farmer entitled "The Country Parson."

Rev. Hoy and his family live on their small farm near his church. He and his son farm it themselves. In fact, he told us that his alfalfa hay got wet.

Many of the folks introduced themselves to us and seemed quite proud that each Sunday many visitors came to their church from almost anywhere in the state. They seemed equally proud of their church which they had remodeled and enlarged in recent years all

tions of recommended garden practices.

Boys and girls interested in these contests should contact their county agent or write to Eugene Wittmeyer, Horticulture Department, Ohio State University, Columbus 10, Ohio.

American Attitude and World Politics

The average American wants to know the score. He wants to know where he's been and where he's going. When he travels by car, there's usually a road map by his side tracing the route. On trains he scrutinizes the timetable.

The average American likes his moves to end on a positive note and not leave the principals dangling in midair. He devours whodunits, though the suspense may become unbearable, in the assurance that he will know the outcome by the final page.

It's this insistence on pat answers that is the American people's nemesis as a world power. So states George F. Kennan, former U. S. ambassador to Russia and something of a student of the American mind. This inflexible mental state, he says, is symptomized by an unwillingness to accept partial solutions and the normal long-term hazards and inconveniences that beset a great power.

It is not the exception, but the rule, asserts Kennan, for a major nation to be caught up in a swirl of espionage and intrigue. Uncertainty, he implies, is not to be regarded as a national neurosis but as a normal price that one pays for greatness.

Kennan is a scholarly man and his remarks are based on his profound knowledge of world history. But, by a curious oversight, he refrains from citing examples of nations that thrived in an air of

To Bachelors: Marry A Secretary

NEW YORK (P)—If I were a bachelor yearning for the matrimonial yoke, I do believe I'd be in Manhattan this weekend.

Some 2,000 business secretaries are here for their annual convention, and I don't know where else in America at the moment a man could go if he is searching for the right girl to love, honor and disobey the rest of his life.

For the business office today is the best of all training grounds for wifehood. Any girl who can run an office efficiently can operate a home at half-throttle.

As I see it, a good secretary has about all the advantages even the most cautious bachelor looks for in a wife, to wit:

1. She can sew on a button.

2. She has learned to keep her trap closed.

3. She knows when to get a man a cup of coffee, and when he prefers aspirin.

4. If she isn't a beauty, she at least knows how to put her best foot forward. She is neat, orderly and well-dressed.

5. She knows how to arrange flowers.

6. She has learned to take dictation from a boss, and therefore

By Hal Boyle

a husband can at least hope she will pay some attention to what he says if only through force of habit.

7. She has the ability to budget money and get the most out of a small income.

8. She can fill out your income tax, and write diplomatic letters of refusal to all the relatives who try to borrow money from you.

9. Any girl who can change a typewriter ribbon successfully probably can learn in a few months to fix your television set, too. The repair bills she saves will in time pay for the cost of the wedding and her subsequent upkeep.

Every year the American girl secretary is getting brainier, better looking and more of a matrimonial bargain.

Executive secretaries have an average salary ranging from \$50 a week in Alabama," says Wald, "to \$82 in Tulsa. They average \$75 in Los Angeles and \$72 in New York."

Mr. and Mrs. B. E. Kelley have returned from a tour of 16 western states.

Softball fans prepared for the game of the year when the Drakes and the Universals battle it out at Wilson Field.

All of which boils down to the following sensible tip to any sensible bachelor:

"Don't let your boss marry his secretary. She's too good for him. Marry her yourself."

New Jersey GOP Hurt By Scandal

Former Governor Harold Hoffman, the Rigoletto of the Circus Saints and Sinners, was for many years one of the leading Republicans in New Jersey, and held political positions after he left the governorship. He was a gay extrovert, an excellent raconteur, a brilliant wisecracker and an enormous spendthrift. After Harold Hoffman's sudden death, it was discovered that he had embezzled funds of the bank over which he presided and possibly other funds.

The Hoffman scandal has wracked the Republican organization of New Jersey and has given high hopes to the Democrats. Few Republicans in that state believe that there is any chance of carrying the state in 1954. Worse that the harness-racing scandal in New York State, the Hoffman scandal strikes a blow because it was wholly unexpected. No one even suspected that Harold Hoffman was not an honest official, eking out a difficult existence. He had managed to keep his secret from the public. I had seen Hoffman on many occasions during the past 10 years and he always gave the impression of not having a worry in the world. It was a marvelous performance.

The Harold Hoffman scandal hits hard the candidacy of Clifford Case for the United States Senate. New Jersey Republicans, on the whole, had no desire to nominate Clifford Case. He is an outsider favored by the White House. His affiliations with Paul Hoffman and the Fund for the Republic of the Ford Foundation do not improve his popularity in New Jersey with old-guard Republicans; and the support afforded him by the A.D.A. definitely places him in opposition to those Republicans who believe in local autonomy.

There is an old history of a

party split in New Jersey, arising out of the famous alleged double-cross of Senator Robert A. Taft by Governor Alfred Driscoll in the 1952 campaign. Taft was certain that he could carry New Jersey in the primaries and the governor told him that he would be strictly neutral. The governor's emissary was Senator H. Alexander Smith. At the last moment, the governor intervened and Taft lost the State. All the explanations offered by Driscoll and Smith never satisfied the Taft element in New Jersey who, to this day, are antagonistic to the dominant group in the party. The versions of this particular double-cross are so numerous and varied that it produced a split. The Taft Republicans are responding to the nomination of Clifford Case by opposing his election.

To add fuel to this fire, Clifford Case fell called upon to try to seduce Senator Joe McCarthy out of the Republican party which, of course, is none of Case's business, that being the primary decision for the Republicans of Wisconsin. Case may feel strongly on the subject but politically it was a foolhardy thing to do.

New Jersey is divided on McCarthy, the line of cleavage being clear and distinct. The Taft element and the old-line Republicans are pro-McCarthy, the New York suburbanites who vote in New Jersey, the Driscoll Republicans and the active Eisenhower Republicans are violently anti-McCarthy. Between them no compromise is possible. Because of the nature of the population of certain cities in New Jersey, an extraordinarily large number of Democrats in New Jersey are pro-McCarthy and while they will not vote for a Republican, they are in a position to stir public feeling.

The unusual situation in New Jersey is that some powerful and influential Republicans are organizing to have Case withdrawn as a candidate. In this effort, they will undoubtedly fail. Some groups are proposing an active campaign to influence Republicans to boycott the election for a United States Senator.

The sum total of all this activity is that it is now generally held that Clifford Case will not be elected in New Jersey, despite the support of President Eisenhower. On the other hand, Case has the support of the CIO

Breeding experiments looking toward development of the Rhode Island Red hen were begun as early as 1854 and the Rhode Island Red Club of America was organized in 1893.

Work of Art in Cemetery Now Crumbling

When the Washington C. H. Cemetery was a thing of beauty and quiet serenity there was a little lake in the center of it beside the fountain. But today the little lake has disappeared (photo above looking toward mausoleum) filled in because it was considered too expensive to clean it out, put in a well for water and keep fish in it to prevent mosquito breeding. (Record-Herald photo)

Fountain Put Up in 1895 Pride and Joy of People

When the fountain in the Washington C. H. Cemetery was erected and dedicated in 1895, it was looked upon as a work of art and a thing of beauty that would be appreciated and preserved forever.

The newspaper expressed the sentiments of the people in these words in its report of the dedication: "The cemetery trustees, Messrs. A. E. Silcott, Milt Burnett and Duncan McLean, are to be congratulated for so grand an undertaking."

Continuing it said that the fountain "will never be looked upon but with kindest feelings toward these gentlemen."

But, if the people view their cemetery with apathy, so will the trustees.

Gilbert Adams found a clipping in a Washington C. H. newspaper of 1895 (he did not know which one) that told of the dedication of the fountain.

"Resting on the four corners of the lower pedestal are water nymphs, and the whole fountain is a combination of art display and most beautiful."

The coping and rail around the basin is still another handsome design, composed of twelve sides or angles, divided by twelve artistic pedestals rising above the coping, which are intended as receptacles for twelve vases or urns of growing plants.

"The object being this: If our cemetery trustees can prevail upon twelve liberal-hearted citizens to contribute a vase or urn for each pedestal, they will order them with the donor's name cast in the base

of each vase, a living monument to the enterprising donor."

The cemetery trustees, Messrs. A. E. Silcott, Milt Burnett and Duncan McLean, are to be congratulated for so grand an undertaking, which work will never be looked upon but with the kindest feelings toward these gentlemen.

WITH the fountain, also, has gone the little lake nearby. It has been filled in and what once was a beauty spot in the center of the cemetery will soon be only a memory.

A few months ago, the Record-Herald published pictures and a story about the neglect of the Judy Chapel and the mausoleum as well as the fountain and made a plea for the people, whose forebears are buried there, to support the cemetery trustees in a program improvement and maintenance.

The cost of upkeep would be comparatively small; replacement of any of these things would be virtually impossible.

DEDICATED as "the finest work of public art in this city" in 1895, the fountain in the Washington C. H. Cemetery (left) today is hardly more than a heap of rubble (above) after years of neglect. (Record-Herald photos)

the overflow passing through the same trench in which the main conducting the water to the fountain is laid. When the water in the lake rises to a certain stage it passes out of the grounds through an underground drain, all the work and idea of Mr. Jacobs."

Lad, 4, Takes Unusual Journey

LOS ANGELES (AP) — Police say Jack Todora, 4, freed the family car from a curb yesterday and steered it downhill through three intersections. Reaching 50 miles an hour, it struck Donald Boudinot's auto, turned it over, killed Boudinot's collie dog, and finally hit James Matthews' house, officers said.

Damage to the car: more than \$1,000. To Jack: a cut lip and three loose teeth.

Exchange Planned

MUNSON, Korea (AP) — The U. N. Command and the Communists will exchange bodies of soldiers buried behind enemy lines starting in September. The bodies of war prisoners who died in POW camps also are to be exchanged.

The Phoenicians established a colony at Carthage before 800 B. C.

He Finds Trouble As Anticipated

KANSAS CITY (AP) — When a drug store employee got a telephone call to make a liquor delivery, he realized that in the past such orders had resulted in holdups.

So Howard Goldenberg of the Highland Pharmacy decided to make a preliminary investigation before delivering the liquor. He left his hilltop in the store, picked up a .38 pistol and drove to the address given by the caller.

As he got out of the car, two men met him, relieved him of his keys, cigarette lighter, watch—and the pistol.

COLUMBUS (AP) — American Legion posts in Franklin County and airmen at Lockbourne Air Force Base announced they are working on plans for the National Sports Car Races on the field's runways Aug. 8.

Parking Meter Vote

NORMAN, Okla. (AP) — Cards of political candidates have been causing traffic trouble. Norman has been collecting its parking meter fines in little boxes put on meter posts. The cards fit neatly into the boxes. Police are finding them stuffed full of "vote for me" pleas.

Tribe Refuses To Fall Apart For Yankees

Cleveland Captures Opener Of Series As Bombers Seek AL Lead

By The Associated Press New York Yankee fans who have been waiting patiently, but confidently for Cleveland to fold look as if they are in for a long wait.

The Indians have two games left today and tomorrow in their current invasion of Yankee Stadium but they could lose both of them by 20 runs and still leave town Sunday night with first place in their possession.

They beat the New Yorkers 8-2 last night and they did it the hard way, coming from two runs behind while allowing the Yankees 14 hits. But it was a victory that left no doubt the Indians are dead serious about this pennant business.

The idea that all they have to do is wait and the Indian menace eventually will disappear has become firmly implanted in the minds of the Yankee followers although the records don't lend much support to the theory.

It's true the Indians have settled for second best the past three seasons and during that spell they found no sure way to halt the Yankees.

But only in 1951 were the Indians in first place this late in the race. That season Cleveland climaxed a drive from sixth by leading for three weeks late in August. But the climb wore out the Indians and they faded five games off the pace in September.

This time it's the Yankees who are trying to reach the top and last night's game was a sample of the troubles they've been having. They left 12 men stranded and Eddie Lopat failed to last for the eighth straight game.

Al Smith was the hitting star for the Indians, breaking up a tie game with a three-run homer in the seventh and then driving in two more with a bases-loaded single in the ninth.

In other action in the American League the Chicago White Sox defeated Boston 7-1; Baltimore pushed Philadelphia into last place with a 7-5 victory and Washington beat Detroit 8-3, leaving the Senators only two percentage points out of first division.

The New York Giants lost their second straight game — the first time since May 29-30 they've been beaten twice running — and second place Brooklyn also lost.

Milwaukee edged the Giants 3-2. St. Louis defeated Brooklyn 6-4. Pittsburgh beat Cincinnati 7-4 and Chicago and Philadelphia split a doubleheader. Chicago won the first game 5-2. The Phils took the second, 5-3 in 13 innings.

Two crowd records were set. The season's largest gathering, 61,446, watched the Indians win. The 45,056 who sat in on Milwaukee's victory, established an all-time County Stadium record.

The Braves fans saw their favorites win on a pinch single with two out in the ninth by Bobby Thomson, who was making his first appearance against his former New York teammates. Thomson's hit was his third in four official times at bat since he broke his ankle in spring training. Bob Buhl flashed his form of last season in going the distance for his second success.

Rookie Joe Cunningham helped Vic Raschi win his first game since June 15 as he drove in three runs with a homer and a double. Gil Hodges and Sandy Amoros homered for Brooklyn.

Danny Schell of the Phils hit a home run in the first game and broke up the second in Chicago with a bases-loaded single in the 13th inning. Howie Pollet, making his first appearance since July 11, was the first game winner. Robin Roberts picked up the second game decision in relief.

The Pirates' victory was their first this season in Cincinnati. Sid Gordon broke up a 4-4 tie with a pinch homer in the seventh inning.

Chico Carrasquel collected three hits as the White Sox began picking up the pieces after losing three of four to the Yankees. Harry Dorish picked up the decision with flawless relief support from Virgil Trucks after seven innings.

The Senators climbed on Al Aber of the Tigers for five runs in the first inning and Chuck Stobbs never gave Detroit a chance to catch up. Roy Sievers hit a two-run homer, his 16th, for Washington.

The Orioles, losers in 15 of their last 17 games, found some one they could beat when they tangled with the Athletics. Chuck Diering's two-run single in the sixth provided the winning margin.

Vermont Cashes Check From 1925

DODGE CITY, Kan., (AP) — Mrs. Merritt Besson thinks cash may be getting a little bit short in Vermont.

She received a canceled \$1 check cashed only recently, which she had sent to Walter Lynds of Plymouth in 1925.

The check was sent to Lynds 29 years ago in payment for "pure Vermont maple products, made in President Coolidge's sugar orchard."

Dick Bartell, Cincinnati Redlegs coach, played 2,016 games during his major league career and compiled a .284 lifetime batting average.

Hilliards Entries

HILLIARDS ENTRIES
For Saturday Night.
FIRST RACE, 25 Class Trot (conditioned), 1 1/4 mile, \$400.
Rasmussen (R. Sugg), Kittie S. Volo (J. Greenway), Hammons' Brother (E. Greenway), Ohio Farmer (C. Miller), Ruth's Orphan (M. Moran), Josedale Rocket (G. Wifong), Mr. Super's Boy (C. Comstock), Edna Carley (L. Newcomer).

SECOND RACE, 25 Class Pace (conditioned), 1 mile, \$400.
Fuzzy Hawk (G. Williams), Austin's (L. Baker), First Defense (H. Feltz), Ohio Son (D. Miller), Jimmy Cochato (F. Trees), Kelley Dillard (B. Keller), Miss Rusty Dan (D. McConaughay), Spangle Way (C. Cox).

THIRD RACE, 25 Class Trot (conditioned), 1 mile, \$400.
Hidden Valley (L. Sue R. Sugg), Winkie (C. Miller), Little Little (A. Edwards), Sharon K. Bradford (W. Flynn), Kathy J. (R. Cheney), Tiny Volo (Scott M. McConaughay), Hi-Lo Volo (W. Amstapha), Pilante Hanover (C. Norris).

FOURTH RACE, C Trot (conditioned), 1 mile, \$400.
Stewart Henley Lad (W. Amstapha), John McIntire (J. Edwards), Devargas (D. Christy), Outlook (E. Van Camp), Dennis K. (C. Miller), Super True (Comstock), Jonesite (C. Buel).

FIFTH RACE, Invitational Pace, 1 mile, \$2000.
Jerry H. (F. Short), Belwin Bunter (P. Martin), Speedway Brownie (C. Snook), Peter Hope (D. Edwards), King's Princess (R. Bidwell), Yedno's Ax (E. Van Camp), Vallee Pointer (R. Rankin), General Harmony (D. Edwards), Josedale Airliner (G. E. Edwards).

SIXTH RACE, C Pace (conditioned), 1 mile, \$400.
Grand Luck (D. Moon), Romeo Spencer (H. Morris), Little Con (A. Edwards), Eddie (the driver), King's Princess (R. Bidwell), Yedno's Ax (E. Van Camp), Vallee Pointer (R. Rankin), General Harmony (D. Edwards).

EIGHTH RACE, Invitational Pace, 1 mile, \$2000.
Same as 5th Race.

NINTH RACE, C Pace (conditioned), 1 mile, \$400.
Flashy Heir (B. Rankin), Big Mountain (H. Foist), Bucks (C. G. Witty), Victory Tune (D. Landis), Mabel Dillard (K. Moisner), Transmitter (no driver), Bay Song (R. Sutton), Miss Anita (E. Loar).

TENTH RACE, C Pace (conditioned), 1 mile, \$400.
Dillard (C. Ewers, Jr.), W. G. (W. W. Ewers), Eddie (the driver), Vola (H. Phillips), Judy (Haven D. Landis), Max Volo (W. Flynn), Wima Chance (D. Irvine), Harvey King (C. Vandyne), Betty Ax (L. Burles).

They Had Pictures On Last Anniversary

OWOSO, Mich., (AP) — A news photographer induced Mr. and Mrs. William Duzenberry to pose for a portrait on their 71st wedding anniversary. Mrs. Duzenberry, 86, had been hospitalized for months. Her husband, 90, had been able to visit her only once because of his own ill health.

The anniversary was their last visit. Mrs. Duzenberry died next day.

Trophies To Be Given Winners of Fair Races

A trophy is to be presented to the winner of every one of the 16 races at the Fair here next week.

Some of the trophies will be just what the name implies, such as loving cups and statuettes. Others will be silver platters, silver service or pitchers. And some of them will be along more practical lines, like horse blanket coolers.

The formal presentations are to be made by representatives of those firms and individuals who put them up.

While the cash purses are no small consideration to the racing stable, many owners admit they cherish the trophies that they can keep to refresh their memories of the exciting days when their horses entered the winner's circle.

WEDNESDAY
2 Yr. Pace OCRA \$1000 Silver Record-Herald
30 Trot 600 Silver Anderson's Drive-Inn
2 Yr. Trot 600 Silver Gossard's Jewelers

21 Trot 600 Spotlight Brandenburg's

Cardinal-Phillies Hassle Could Have Been Huge Riot

By GAYLE TALBOT

NEW YORK (AP) — After one has gone into the strange affair at some length, he does not wonder that there was a certain amount of confusion just before darkness descended upon Busch Stadium in St. Louis last Sunday.

He wonders, rather, that there occurred no more than a small-size riot between members of the St. Louis Cardinals and Philadelphia Phils, that a game was forfeited to the Phils, and that Manager Eddie Stanky of the Cards wound up with no worse than a fine and suspension and making a public apology to the fans of his town. The possibilities were much greater than that.

To recall the circumstances, the Phils were leading 8-1 and were still at bat in the top of the fifth. Once they were out and the Cards had taken their turn, it would have been a legal game and, probably, a Philadelphia victory. The sun was down Stanky—and apparently everybody else in the park—was under the impression that the lights could not be switched on to

complete a game that had started after 6 o'clock.

So, as is common in such cases,

Stanky stalled for time. He brought in fresh pitchers at the drop of a foul. Tempers flared and there were fistfights. Finally, with two Phils out, Umpire Babe Pinelli lost patience and forfeited the game to the visitors.

National League President Warren Giles, in upholding forfeiture and in meeting out punishment, observed that Stanky—and, presumably, everyone else—did not realize there was a new league rule which permits the turning on of lights to complete Sunday games in all cities except Philadelphia and Pittsburgh. The only stipulation is that no Sunday game may be started under lights—in other words, no scheduled night games on that day.

So, where does that leave us?

It leaves us facing the fact that Stanky, not knowing of the rule

passed at the last league meeting, committed acts which cost him a ball game that his club might possibly have won in the regular

series.

And so, we seem to arrive at the fact that, before this season, National League umpires did not permit Sunday lighting under any circumstances, though there was no official rule against it. And that now, when they are specifically instructed to finish Sunday games under the lights when necessary, they don't seem to know about it.

We also come to the conclusion that Stanky should try protesting the game again, just to see what happens.

Serious Texan Holds Edge In PGA Tournament

ST. PAUL (AP) — There is more to matchplay golf than mere mathematics, but the figures might give you the winner of the 36th PGA championship.

With only 16 players left after the two 18-hole "sudden death" rounds were passed with a minimum of unforeseen casualties, there was time today to check up on the "hot" players.

The three who have played the best in the first three days include two of the best-natured guys in the pro golf business, Ed Oliver of Lemont, Ill., and Argentina's Roberto De Vicenzo, and the usually serious Shelley Mayfield, from Texas.

Here's how they stand against Keller's vulnerable par of 36-35-11 for two days of qualifying and two rounds of 18-hole match play:

Mayfield has shot 63 competitive holes 15 strokes under par. Oliver is 11 under par for 69 holes. De Vicenzo is nine under par for 65 holes.

tion nine innings under lights.

It also leaves us wondering why the umpires, if they were aware of the new rule, did not remind Stanky of it when he began stalling for time. Part of an umpire's duties is to head off trouble.

Driven by curiosity, we have sought to read a copy of the new regulation locally, but so far with out success.

"I think we have a copy somewhere," said one magnate. "Any way, there's no doubt that the rule was passed, because I was there."

It was told that, believe it or not, there was nothing in the previous year's regulations that said one way or the other whether the lights could be turned in St. Louis on Sunday. It said games at Philadelphia and Pittsburgh had to stop at 6:59 p.m., and that there could be no Sunday lights at Boston, which still was in the league when the copy was printed. But nothing at all about the other cities.

And so, we seem to arrive at the fact that, before this season, National League umpires did not permit Sunday lighting under any circumstances, though there was no official rule against it. And that now, when they are specifically instructed to finish Sunday games under the lights when necessary, they don't seem to know about it.

We also come to the conclusion that Stanky should try protesting the game again, just to see what happens.

"IT'S SO EASY TO PLACE A WANT AD."

A Farmer's Notebook

(Continued from Page Two)
hundred bales per acre were cut on an 18 acre field of alfalfa, red clover, timothy, Ladino clover mixture that had had an early spring application of 50 pounds 10-10-10 fertilizer per acre and the field had been well limed the previous year using hydrated lime at the rate of 500 to 600 pounds per acre.

"This 1-1-1 ratio of fertilizers is rapidly growing in popularity in the corn belt, even on our very good bottom land where we used to use little or no fertilizer, because it cost too much." We know now that lime and fertilizer can be used in much larger quantities than most people realize, and profitably, too, and that fertile bottom land can be profitably fertilized."

THE GREATEST POWER IN THE WORLD

It is the power of prayer. It is the most important factor too in improving people; and it is in this realm that we have the greatest opportunity, for the possibilities of improving people are limitless.

And where is the best place to begin improving people? It is with little children; they should be reared in a clean, wholesome environment, and there is no better environment than on a farm, where they live close to nature's God. They should be taught, very early in life, to get the habit of thanking God for their many blessings, and to pray about their troubles instead of worrying about them—and they have many troubles that are as big to them as grown people's troubles are to them. There are many adults who have not learned this simple lesson, so they worry themselves to death, and worrying takes as much energy as working, so when you work and worry you do double work, and when you go to bed and take your troubles with you, you're still working full time. One of the most important things we can do, is to learn to pray about our troubles instead of worrying about them and then before we even try to go to sleep, ask God to forgive you for the mistakes you've made then turn all your troubles over to Him and ask for divine help and guidance in working them out; then give thanks for all your many blessings; and we all have many great blessings; then let go, and let God run the world, while you get your rest. When you practice this awhile, you'll be pleased at the results; when you waken your problems will be much simpler, and often worked out for you.

He purchased the Fayette Canning Co. in 1905 and has been the chief owner since that time, operating it most of the time under his personal direction, until a few years ago.

It is noted in the article that Campbell, as head of the Dahl-Campbell Wholesale Co., introduced distribution of food, etc., to the retail trade, by being the first firm in this part of the country to use a fleet of trucks.

He has always been prominent in the canning business and was formerly on the board of directors of both the state and national canning associations.

Last January he was elected president of the "Old Guard Society," a social organization for veterans of the cannery business, at the Atlantic City convention of the National Canners Association.

He also received the Old Guard diamond pin in 1948 and completed 50 years as a Mason and receive the Masonic diamond pin in 1942. Last year he was presented with the diamond pin from the Rotary Club of which he is one of the few charter members.

Governor Sticks To Letter Of Law

ALBUQUERQUE, N.M.—Gov. Edwin Mechem, former FBI agent, lives up to the letter of the law. He got a ticket for overparking. He sent a note from his Santa Fe office with a \$1 bill attached to the ticket. The note said:

"The attached was attached to my car for overstaying my leave. If the enclosed is not sufficient to pay the charge, please advise me or, if you want me to appear in person I will do so."

The judge said Mechem won't have to appear.

House Gives OK To Ohio Air Base

WASHINGTON (AP)—The House has approved spending \$4 million for 4,250 acres of land in Northeast Ohio for a new Air Force Navy Reserve training center.

The exact site is uncertain.

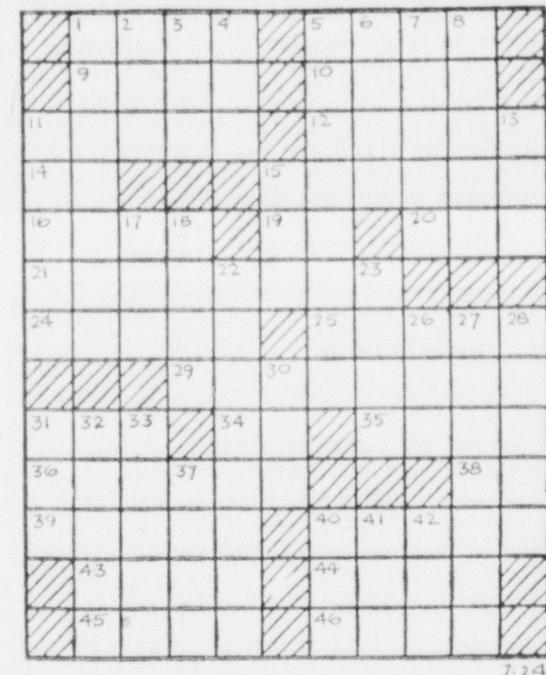

The item was one of many in a half-billion-dollar military construction appropriation approved by voice vote yesterday.

The base, chiefly for weekend fliers, is expected to cost \$18 million and be located somewhere in the Cleveland-Akron area.

When any fuel is burned, it is first converted into gas and the gas burns.

Water Supply Here Looks Good

Rainfall for Year Is Above Normal

With the Ohio Division of Water this week issuing another warning that ground water supplies and stream flow in the state will be at a record low level this fall, Fayette County is fortunate in being one of the few areas in the state where precipitation for the year to date has been above normal.

The warning issued was directed chiefly to municipalities urging managers of all municipal water supplies to take immediate inventory of their source of supply and, if necessary, to put in effect such water conservation measures as may be necessary to maintain an adequate supply.

So far in July, the rainfall here has been about normal and if normal precipitation continues, Washington C. H. and community should get through the emergency better than last year.

The only additional source of supply provided here by the Ohio Water Service Co. since the drought last year was a well drilled south of the Belle Aire Addition, about which little has been announced in recent months.

THE WARNING issued by the Ohio Water division was made to operators of all municipal water supplies in the form of a report describing Ohio's present water situation.

The Division pointed out that during the seven months, October 1953 through April 1954, rainfall was 4.32 inches below normal, and as a result there was far less recharge to ground water aquifers than is normally expected. It also was pointed out that "we have passed the period when any ground water recharge can be expected and that from now until fall both ground water levels and stream flow can be expected to decline."

Municipalities with surface water supplies from reservoirs were warned that stream flow (into reservoirs) will be at near record low so they may expect that the greater proportion of daily consumption will come from storage.

Although the reservoirs may be full now, the Division points out, unless the storage is enough to make up for the deficiency in stream flow there may not be water enough to meet the anticipated demands of the next few months.

They urge these municipalities to institute water saving measures now and plan for supplemental supplies before a crisis arises.

MUNICIPALITIES with ground water supplies only are warned that these levels will be at record lows. They point out that although few ground water supplies were short of water last year, the effects of two years of deficient recharge are cumulative and as a result of this deficient recharge many ground water users have been pumping almost entirely from storage and in many places that storage may be nearing depletion.

They are urged to institute water conservation measures from now on since the rate of decline in a ground water reservoir is in part determined by the rate of use.

The reports state that although the Division cannot predict which municipalities will have trouble not exactly when that trouble may come—it definitely is on that way and that each community must maintain a close watch on its own supply.

The Division of Water is preparing to cooperate as much as possible in the planning, installing of instruments and establishing of an adequate water level observation program in every municipal well field in the state.

DAV Here Chooses State Delegates

Commander William Gardner and Edward Sexton will be the delegates from Fayette County to the state convention of the D.A.V. (Disabled American Veterans) in Columbus. They will leave Friday afternoon and remain in Columbus for the full three days of the convention through Aug. 1.

The meeting is expected to be the largest state convention in the history of the D.A.V. The Ohio chapter, the nation's largest for the past 17 years, is bigger than ever this year. Officials expect that previous convention attendance records will be surpassed easily.

One of the highlights of the convention will be the Chapter Service Officers' School on Friday. Fourteen national service officers and officials of the Veterans' Adminis-

tration will be in charge of the school.

National Commander Howard V. Watts will be present to address the convention, as well as state of ficers and representatives of other veterans' organizations.

The annual convention banquet will be held July 31 at the Deshler-Hilton Hotel.

The D.A.V. is made up of men who were wounded, gassed or disabled as the direct result of wartime service. It is the only veterans' organization of its kind chartered by Congress.

Mainly About People

Wayne Davey was returned from Memorial Hospital to his home in Sedalia, Friday afternoon. He had been a patient for medical care.

Mrs. Emma Badgley, Route 2, Sabina, was admitted to Memorial Hospital, Friday afternoon for minor surgery, Saturday morning.

Morgan Wilson was released from Memorial Hospital, Friday afternoon and taken to the Smith Rest Home, in the Gerstner ambulance.

Sherman Belles, 317 Western Avenue was admitted to Memorial Hospital, Friday afternoon. He is a patient for observation and treatment.

Safe Secrets was taken from his home, 1121 Grace Street, to University Hospital, Columbus, Friday afternoon in the Gerstner ambulance, for medical treatment.

Mrs. Max Alspaugh and infant son were returned from Memorial Hospital to their home in Bloomingburg, Friday afternoon.

After being a surgical patient in Memorial Hospital, Neil McCloskey was returned to his home, Route 1, Bainbridge, Friday afternoon.

Mrs. Warren Schleich will leave Sunday for Chicago, where she will attend the National Fall Millinery Show at the Palmer House, from Sunday, July 25 through Friday, July 30, in the interest of the Roe Millinery, of which she is manager.

Mrs. Charles Archer and infant daughter were returned from Memorial Hospital to their home, Route 1, Jeffersonville, Friday afternoon.

Mrs. Mamie Stover, who had been treated in Memorial Hospital for a fractured hip, was returned to her home in Sabina, Friday afternoon.

Mrs. Willard McConaughay and infant son were released from Memorial Hospital to their home, 515 South Main Street, Friday evening.

Blessed Events

Mr. and Mrs. Ralph Bellar of Dayton, are the parents of a six pound son, born at 10:50 A. M. Friday in Memorial Hospital.

A son, weighing seven pounds eleven ounces, was born in Memorial Hospital, Friday at 11:11 P. M., to Mr. and Mrs. Loyd Conover, Route 1, Jeffersontown.

Mr. and Mrs. Richard Edwards, 826½ Leesburg Avenue, are the parents of an eight pound fourteen ounce daughter, born in Memorial Hospital Saturday at 6:06 A. M.

An eight pound eight ounce son was born to Mr. and Mrs. Kenneth Stillings, 621 East Paint Street, in Memorial Hospital at 12:04 A. M. Saturday.

Mr. and Mrs. Rollo Gray, Route 3, Sabina, are the parents of a daughter, weighing six pounds eleven ounces, born in Memorial Hospital, Saturday at 5:23 A. M.

WCH Man Held For Auto Theft

Larry Charles Donohoe, 32, city is being held here for Columbus police, who want to question him regarding theft of a Mercury automobile in that city.

Donohoe was arrested by police here Friday afternoon, while he was in the stolen car on Walnut Street, and will be turned over to the Columbus officers some time Saturday.

The stolen car contained fictitious license plates, police said.

Most ocean fishing grounds are in areas where the depth is not greater than 200 fathoms.

Driver Is Found In Cemetery

He Was Wanted On Hit-Skip Charge

Among those arrested by the police and state patrol over Friday and early Saturday, was LaFayette N. Ater, 22, Clarksville, charged with leaving the scene of an accident and with having fictitious license plates on his car.

Ater was arrested in the Washington C. H. Cemetery, where he was in hiding after having crashed into Donald Soale's car parked at the curb on Washington Avenue. The crash caused \$300 damages to the car as well as considerable damage to his own, police said.

After the accident, Ater drove his car, minus a tire, eastward and turned into the cemetery, where police said they found him.

Police said they were able to follow him by the rim marks of the tireless wheel on his car.

He was locked up until his hearing could be held.

Arrested on Clinton Avenue for too much speed were Harry F. Thornhill, Route 6, Marvin Hirschel, Spencerville, and Donald Behm, Columbus.

The state patrol picked up Wendell Barney, Newark, traveling 80 miles an hour on U. S. 62; Donald J. Swingle, Brunswick, for driving 70 miles an hour on U. S. 62; David Huley, reckless operation on Route 70 and Joan F. Macey, reckless operation on U. S. 62.

Thomas Eugene Noel, city, was arrested for not having an operator's license.

DAMAGE HEAVY

HILLSBORO—Following the 5.72 inch rainfall here, Tuesday night, the worst on record here, damage to Highland County roads and bridges was placed at \$75,000.

FOUR POLIO CASES

CHILLICOTHE—So far this year four polio cases have been reported in Ross County, compared with a total of 24 cases last year.

JURY DISAGREES

WILMINGTON—A jury of seven men and five women who had been out 12 hours deliberating on the charge of criminal abortion against Dr. Herbert C. Blackburn, Blanchester osteopathic physician, was dismissed after failing to agree. A retrial is planned.

REALTY TRANSFERS

Clarence L. Campbell to the board of trustees of Union Township, 491 acres.

Peasee Stokesbury to Ralph Wilson, 42 acres in Union Township.

INHERITANCE TAX

The George Weaver estate inheritance tax has been fixed at \$53,23, based on a taxable value of \$4,266.47.

CLAIMS FILED

A schedule of claims filed in the Frank Coe estate has been approved.

NO ADMINISTRATION

The Eva H. Marchant estate has been relieved of administration.

NO APPRAISEMENT

The probate court has ordered a new appraisement in the George F. Erich estate, and named Charles E. Keller, M. W. Kessler and S. T. Simpson as appraisers.

SALE CONFIRMED

Sale of property in the Minnie Divens estate has been confirmed.

START BANGS TEST

HILLSBORO—The mobile Bang's testing laboratory of the Ohio Department of Agriculture will start Monday, testing milk samples in Highland County.

Songfest Draws 45 Friday Night

Big Time Planned For Next Meeting

Forty-five persons, including several out-of-county visitors, attended the 49th songfest at the home of Mr. and Mrs. Roy Wipert on the Wilmington Highway, Friday night, and thoroughly enjoyed the event.

Hymns of Phillip Bliss were featured, with Mrs. Maude Howland at the piano and Roy Wipert at the organ.

Various persons took part in leading the hymn sing.

Concluding the hymn sing, the group sang the favorite hymn of the oldest person present, Mrs. Myrtle LeFever, and that of the person whose birthday was nearest the date of the meeting, Mrs. Barbara Haines of Stanton.

Two persons tied for the highest attendance record, Mrs. Claude Davis and Mrs. Helen Thornton.

Popular songs were enjoyed, with Ulric Acton at the piano, and old time favorites were sung, with Mrs. O. E. Bonnell at the piano.

Special numbers were given by Mrs. Gene Clay and Mrs. Palmer, and guitar and voice number by Mrs. Millie Crissinger.

Out-of-county guests included Rev. and Mrs. Clyde N. Rogers and son, Joel, of Linworth, Rev. Rogers spoke interestingly on "The Royal Palm," and both he and Mrs. Rogers gave an entertaining and interesting account of their European trip some time ago.

Other guests were: Mr. and Mrs. Ralph Palmer and children of Chicago, Ill.; Jack Clauson and son, South Bend, Ind., and Mr. and Mrs. Godfrey Horst, Columbus.

The next meeting, the 50th, and the fifth year anniversary, has tentatively been set for August 20, with something out of the ordinary being planned to make the meeting an important one.

Refreshments were served at the conclusion of the songfest Friday night.

Poet's Corner

TOMORROW

Tomorrow, men will dream new dreams
And with God's sharing grace,
Their finite minds will pioneer
The utmost bounds of space;
Strange wonders of sight and sound

Will greet the ear and eye;
And speeding messengers of steel,
Uncharted courses fly.

Tomorrow, men will turn to God
And call upon His name;
And He will set His love upon
The ashes of their shame;

Fools will become as wise men are
And tell with one accord,

The wonders and the judgments
Of God's enduring Word.
